WORLDTRADERS AI

COOKIE NOTICE

Osben Export-Import • Osben Digital • privacy@worldtradersai.com • worldtradersai.com — Version 1 • Effective 16 November 2026 • Last updated 16 November 2026

1. ABOUT THIS COOKIE NOTICE

1.1 This Cookie Notice explains which cookies and similar technologies the Website worldtradersai.com and the software service WorldTraders AI (the "**Service**") store on your device or read from it, why, for how long and on what legal basis. Osben Export-Import, a sole proprietorship owned by Benson Success Osawe ("Osben", "we") is responsible. WorldTraders AI and Osben Digital are further names used by the same business, not separate legal entities. Our details are in the Impressum.

1.2 Personal data processed through these technologies is described in our Privacy Notice. This notice applies to visitors and to Authorised Users of the Service.

1.3 The information in Section 4 comes from a browser-level scan of the live site (worldtradersai.com), run in a clean browser window, and from our platform provider's statements.

2. WHAT COOKIES AND SIMILAR TECHNOLOGIES ARE

2.1 **Cookies** are small text files that a website stores in your browser. A **first-party** cookie is set by the site you visit. A **third-party** cookie is set by another provider whose service the site uses.

2.2 **Similar technologies** include local storage, session storage and IndexedDB in your browser, device identifiers and similar scripts that store or read information on your device. In this notice, "cookies" includes them unless we say otherwise.

2.3 **Duration.** Session cookies are deleted when you close your browser. Persistent cookies stay until they expire or you delete them.

3. OUR APPROACH

3.1 We store or read information on your device only where it is strictly necessary for us to provide a service that you have expressly requested, or to transmit the communication. We do not use cookies for analytics, advertising, marketing, profiling or tracking across websites.

3.2 Our platform does not offer a consent mechanism for visitors, and we have chosen not to add optional cookies that would need one. If we ever add optional cookies, we will update this notice, add a consent mechanism and ask for your consent before setting them.

4. WHAT WE USE

Name	Set by	Purpose	Lifetime	Type
__cf_bm	Cloudflare (third party), network edge provider engaged by our platform provider, Lovable	Bot management: helps tell humans from automated traffic and protects the Service against abuse and attacks. Flags: Secure, HttpOnly, SameSite=None	About 30 minutes	Strictly necessary; security
__dpl	Our hosting layer (first party)	Routes you to a consistent version (deployment) of the Service during your visit, so that pages and scripts match and the Service works. It cannot be disabled. Flags: Secure, SameSite=Lax	About 1 day	Strictly necessary; technical delivery
Sign-in session (local storage, not a cookie): key “sb-” followed by the backend project identifier, then “-auth-token”	Our platform’s sign-in function (first party)	Keeps you signed in and protects your session after you log in	Set only after sign-in. Stays until you sign out or delete the site data	Strictly necessary; sign-in
tsr-scroll-restoration-v1_3	Our website (first party), session storage	Remembers the scroll position of the page you are viewing	Deleted when you close the tab or window	Strictly necessary; technical
session-id	Our platform’s analytics function (first party)	Identifies an analytics session. Not set while the platform’s analytics are switched off	Not set	Not used

This list reflects what the scan found and what our platform provider has told us. If we add or remove anything, we will update this table.

4.1 Why each item is strictly necessary

- **Security cookie (__cf_bm).** Without it, the edge network cannot reliably distinguish genuine users from automated attacks, and the Service could be disrupted or abused. It is needed to provide the Service securely to the users who ask for it.

- **Deployment routing (__dpl).** When we update the Service, different versions can exist for a short time. The cookie makes your browser load pages and scripts from the same version, which prevents errors and a broken page. It does not identify you.

- **Sign-in session.** After you sign in, the Service needs to recognise your requests as yours. Without the session, you could not use the account features you asked for.

- **Scroll position (tsr-scroll-restoration-v1_3).** The Service remembers where you are on a page, so that the page does not jump back to the top when you navigate or reload. It

is a technical entry in session storage, is deleted when you close the tab or window, and does not identify you.

5. WHAT WE DO NOT USE

- **Analytics.** Our platform provider offers page-view analytics for published apps. They would record the full address of each page requested and a session identifier. We have switched them off, so the script is not loaded and no analytics session is set. We use no analytics tool of our own.

- **Advertising and marketing.** We set no advertising or marketing cookies and use no retargeting or social-media tracking.

- **Fonts.** The Website's fonts are hosted by us, so your browser does not contact Google or another third party to load fonts.

- **Requests to other servers.** Before you sign in, the Website makes no request to any other server (no Google fonts, no Google scripts, no analytics). After you sign in, the only outside server contacted is the backend of our platform provider (Lovable Cloud), reached through Cloudflare.

- **Google sign-in.** If you choose "Continue with Google", you leave our page for Google's sign-in. Google acts as an independent controller and applies its own cookie and privacy rules. We do not load Google's sign-in before you choose it. See our Privacy Notice.

6. THIRD PARTIES

6.1 **Cloudflare** sets the security cookie and processes traffic data (including IP addresses) at the network edge. Cloudflare is a sub-processor of our platform provider, Lovable; we have no contract of our own with Cloudflare. Cloudflare operates a global network, so processing can take place outside the European Economic Area. Lovable's data processing agreement (Section 8) requires an adequacy decision or appropriate safeguards for such transfers; Lovable has not told us which one applies to Cloudflare. See Section 8 of our Privacy Notice.

6.2 **Our platform provider** (Lovable Labs Incorporated, 1 Lincoln St, Boston, MA 02111, United States) hosts the Service and operates the sign-in, the hosting layer and the AI gateway. Its role and safeguards are described in the Privacy Notice and in our Data Processing Agreement.

7. LEGAL BASIS

7.1 **Access to your device (§ 25 TDDDG).** Storing information on your device or reading it does not need your consent where it is strictly necessary for us to provide a digital

service that you have expressly requested (§ 25(2) no. 2 TDDDG). The four items in Section 4 meet this test.

7.2 **Personal data (GDPR).** Where data collected through these items is personal data, we process it on the basis of Art. 6(1)(b) GDPR (providing the Service you request) and Art. 6(1)(f) GDPR (our legitimate interest in the security and stable operation of the Service). You may object under Art. 21 GDPR; see the Privacy Notice for how.

7.3 **No consent banner.** Because only strictly necessary items are used, we do not show a cookie banner and have no cookie-consent record to keep. This is our assessment of the law and of how the Service is built, and it holds only while nothing else is stored or read.

8. YOUR CHOICES

8.1 **Browser settings.** You can delete cookies, local storage and session storage, or block them, in the settings of your browser (usually under “Privacy”, “Security” or “Site data”). Each browser explains how in its help pages.

8.2 **Effect of blocking.** If you block the strictly necessary items, you may not be able to sign in or use the Service, pages may load incorrectly, and some security checks may fail.

8.3 **Signing out.** Signing out of the Service ends the sign-in session. Deleting site data in your browser removes stored items.

8.4 **Browser signals.** We do not track you across websites, so we do not respond to “Do Not Track” or similar browser signals differently from other visitors.

9. CHANGES TO THIS NOTICE

We update this notice when the cookies we use change or the law or our providers change. The current version is at https://worldtradersai.com/cookies, with its date above. If we add anything that needs consent, we will ask before setting it.

Version	Date	Change
1	16 November 2026	First version
